WHAT IS THE PEDIATRIC ACES AND RELATED LIFE-EVENTS SCREENER (PEARLS)?

At your child’s pediatrician visit, you will be asked to complete the Pediatric ACEs and Related Life-events Screener (PEARLS) to better understand your child’s trauma experiences. We are interested in this information as childhood traumas have been linked to serious and lasting physical, emotional, and mental health consequences.

STEP 1: WHAT ARE EXAMPLES OF CHILDHOOD TRAUMA?

Childhood trauma, or adverse childhood experiences (ACEs) can include:

- Emotional abuse
- Physical abuse
- Sexual abuse
- Emotional neglect
- Physical neglect
- Mother treated violently
- Household substance abuse
- Household mental illness
- Parental separation or divorce
- Incarcerated household member
- Bullying (by another child or adult)
- Witnessing violence outside the home
- Witnessing a brother or sister being abused
- Racism, sexism, or any other form of discrimination
- Being homeless
- Natural disasters and war

STEP 2: WHAT DOES THE SCORE ON THE PEARLS SCREENER MEAN?

The score on the PEARLS screener will provide us with information on the number of childhood traumas your child has experienced. Research has found that the higher the total PEARLS score, the greater the risk for poorer physical, behavioral, and mental health outcomes (listed below). However, we know that early intervention and prevention is key to protecting your child and we will use your ACE score to help connect you to resources.

**STEP 3: HOW CAN I HELP MY CHILD?**

It is important to know that parents/caregivers play a critical role in buffering the impact of childhood trauma and building their child’s resilience. Research has found that creating positive experiences with your child and being a caring, consistent adult in your child’s life can serve as a protective factor against adversity. Here are some ways to help build resilience:

- Play with your child! Allocate 5 minutes a day where you and your child have fun together and play.
- Providing your child with healthy nutritious options for snacks and meals, encouraging exercise and activity, and making sure they are on a routine sleep schedule, are significant factors in promoting your child’s well-being
- Model for your child ways to manage their emotions. You can practice calming skills together like taking deep breaths when you are both upset
- Identify your child’s strengths and praise them multiple times a day

**STEP 4: WHAT ARE SOME RESOURCES THAT CAN HELP ME UNDERSTAND ACEs BETTER?**
