

## TELEHEALTH VISITS AT CHOC CHILDREN'S

With the current impact of COVID-19, CHOC Children's is ensuring continuity of care for patients by offering telehealth visits. These convenient appointments enable your patients to have virtual visits with our pediatric specialists by using a smartphone, tablet or computer.

The specialist will determine if a telehealth visit is appropriate for each patient. For those who need to be seen in person, our clinics are prepared to keep patients and families safe.

### **How to request a visit**

To schedule a new visit, please call the Patient Access Center at 888-770-2462.
