

PROJECT VIETNAM PARTNERING FOR SCHOOL SAFETY

As schools are reopening, in order to enhance safety, the Project Vietnam Foundation would like to support pediatricians by making the following available:

Donation of Quick COVID Antigen Testing for Pediatricians

- The BinaxNow received emergency approval by FDA for a 15-minute Antigen test which can be done at home or at a worksite. The Federal government has purchased the first 150 million tests to distribute to Native and high-risk communities, and skilled nursing facilities. This is 91% sensitive and 100% specific.
- Boxes of 40 tests can be made available to pediatricians upon request.
- Can be used before releasing a child to school since Covid-19 symptoms are so diverse.

Donation of Disposable 2-ply Masks

- AAP-OC Members can request one box of 1,000 for the school of their choice.
- Private schools, childcare facilities, etc. may be lacking.
- Project Vietnam will need an acknowledgement form from the recipient by email.

Pediatricians are asked to email info@projectvietnam.org for requests and arrangements can be made for delivery or pickup.
